

Rahul Dubey

Backend Developer | Node.js · NestJS · ExpressJS · MongoDB · MySQL | 5+ Years
Ajmer, Rajasthan | +91 7014615922 | dubeyrahul890@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Backend Developer with 4.8 years of experience specializing in Node.js, NestJS, and ExpressJS. Experienced in scalable REST APIs, full-stack applications, payment integrations, SQL/NoSQL databases, and Linux/Nginx deployment. Delivered 10+ production projects across e-commerce, ride-hailing, healthcare, on-demand services, and SaaS.

TECHNICAL SKILLS

Languages	JavaScript (ES2022+), TypeScript
Backend	Node.js, NestJS, ExpressJS, REST APIs, 3rd-Party API Integration, Chat Socket
Databases	MongoDB, MySQL, PostgreSQL, Redis
Payments	Stripe, UPI & 3rd-Party Payment Gateway Integration
Frontend	HTML, CSS, Bootstrap, jQuery, Ajax, Axios
DevOps	Nginx, Linux, Git, GitHub, Server Deployment
Familiar	RAG, ReactJS, AI Integration

WORK EXPERIENCE

Backend Developer (Node.js) | [Konstant Infosolutions Pvt. Ltd.](#)

Jan 2022 – Present

Jaipur, Rajasthan · IT Services & Product Development

- Design and develop scalable RESTful APIs using Node.js and ExpressJS, enabling seamless communication between frontend and backend across 10+ client projects.
- Integrate diverse third-party APIs (maps, SMS, notifications, social auth) into production applications, reducing client integration time by standardizing reusable modules.
- Implement secure payment processing workflows using Stripe, UPI, and other third-party payment gateways, handling end-to-end transaction lifecycles including webhooks, refunds, and subscription billing.
- Manage database design and optimization across MongoDB and MySQL, applying TypeORM and Sequelize for clean data access layers.
- Deliver SaaS, on-demand service, e-commerce, healthcare, and ride-sharing platforms — collaborating directly with clients to translate requirements into production-ready features.

Junior Developer (Front-End) | [SeekAce Solutions](#)

Jun 2021 – Jan 2022

Jaipur, Rajasthan · Software Development

- Contributed to admin panel development — built CRUD functionality for the user registration module using PHP.
- Implemented a data export feature (Excel) for admin reporting, reducing manual data extraction effort for the operations team.

KEY PROJECTS

On-Demand Service Platform | [Node.js](#) · [ExpressJS](#) · [MongoDB](#) · [Stripe](#)

- Architected a multi-service on-demand platform supporting bathing, car washing, childcare, gardening, and 10+ service categories.
- Integrated Stripe payment gateway with subscription and wallet functionality for premium users.

E-Commerce Platform | [Node.js](#) · [ExpressJS](#) · [MongoDB](#) · [Ajax](#) · [Axios](#) · [UPI](#)

- Developed a subscription-based e-commerce platform with a points rewards system, wallet, and UPI/Stripe payment integration.
- Built a backend agriculture buy/sell marketplace with product listing and transaction flows.

Tour & Travel Service | *Node.js · ExpressJS · MongoDB · Stripe*

- Built a comprehensive travel booking app with personalized tour recommendations based on location and budget.
- Integrated Stripe for secure payment processing across all booking flows.

Doctor / Patient Appointment App | *Node.js · ExpressJS · MongoDB*

- Developed an appointment management system connecting therapists and patients for health checkup scheduling.
- Built a social media module for healthcare professionals to post medical content (cancer, chronic illness awareness).

Employee Wellbeing SaaS | *Node.js · NestJS · MongoDB · TypeORM*

- Contributed to a SaaS-based employee wellbeing platform with multi-tenant architecture.
- Built REST APIs for employee engagement features and integrated third-party wellness service providers.

Freelance Job Platform | *Node.js · ExpressJS · MongoDB*

- Built a Fiverr-style bidding platform where job seekers can discover and bid on client projects.
- Implemented project posting, bid management, and communication workflows between clients and freelancers.

QR-Based Activity Tracker (Samsung) | *Node.js · ExpressJS · SQL · SQLite*

- Developed a QR-based customer engagement platform for Samsung retail stores across India, letting users scan codes to access AI smartphone features, videos, and product information.
- Built APIs to track user interactions and send real-time analytics to the Samsung backend for store-wise visitor insights and engagement reporting.

AI Trip Planner | *Node.js · ExpressJS · MongoDB · Gemini Integration*

- Built an AI-powered trip planning feature using the Google Gemini API to recommend location-based trips personalized to each user's preferences and travel history.
- Designed prompt pipelines combining user profile, visit history, and real-time location context, surfaced through a React.js interface with fallback logic for low-confidence responses.

SRS RAG Assistant | *AI Document Q&A for Project Development*

- Built a Retrieval-Augmented Generation (RAG) system so project teams can query 50+ page Software Requirements Specification (SRS) PDFs in natural language.
- Implemented a PDF ingestion, chunking, and embedding pipeline with vector-based semantic search, extended to auto-generate module-wise development plans and speed up sprint/API design.

EDUCATION

B.Tech — Computer Science & Engineering

2016 – 2020

St. Wilfred Institute of Engineering & Technology · Aggregate: 64%

CERTIFICATIONS

- AWS Community Day — Participation Certificate
- White Hat Hacker & Penetration Tester — Eduonix
- Web Developer Course — Completion Certificate
- Claude with the Anthropic API — Completion Certificate
- Claude Code in Action — Completion Certificate
- SEMrush SEO Toolkit Exam — SEMrush Academy
- Claude 101 — Completion Certificate
