

Rahul Dubey

Backend Developer | Node.js · NestJS · ExpressJS · MongoDB · MySQL | 5+ Years

Ajmer, Rajasthan | +91 7014615922 | dubeyrahul890@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Backend Developer with 4.8 years of experience (Konstant Infosolutions) building scalable RESTful APIs and full-stack web applications using Node.js, NestJS, and ExpressJS. Hands-on expertise across the full project lifecycle from architecture and API design to deployment on Linux servers with Nginx. Delivered 10+ production projects across ride-hailing, e-commerce, on-demand services, healthcare, and SaaS domains. Experienced with payment gateway integrations (Stripe, UPI), NoSQL/SQL databases, and TypeORM/Sequelize ORMs.

TECHNICAL SKILLS

Languages	JavaScript (ES2022+), TypeScript
Backend	Node.js, NestJS, ExpressJS, REST APIs, 3rd-Party API Integration, Chat Socket
Databases	MongoDB (NoSQL), MySQL, PostgreSQL, Redis
ORM / ODM	TypeORM, Sequelize, Mongoose
Payments	Stripe, UPI, Payment Gateway Integration
Frontend	HTML, CSS, Bootstrap, jQuery, Ajax, Axios,
DevOps	Nginx, Linux, Git, GitHub, Server Deployment
Familiar	RAG, Docker, React, Angular

WORK EXPERIENCE

Backend Developer (Node.js) | Konstant Infosolutions Pvt. Ltd.

Jan 2022 – Present

Jaipur, Rajasthan · IT Services & Product Development

- Design and develop scalable RESTful APIs using Node.js and ExpressJS, enabling seamless communication between frontend and backend across 10+ client projects.
- Integrate diverse third-party APIs (maps, SMS, notifications, social auth) into production applications, reducing client integration time by standardizing reusable modules.
- Implement secure payment processing workflows using Stripe and UPI, handling end-to-end transaction lifecycles including webhooks, refunds, and subscription billing.
- Work across full-stack environments (Node.js, MySQL, MongoDB, HTML/CSS/Bootstrap/jQuery) on both Windows and Linux servers, deploying applications behind Nginx.
- Manage database design and optimization across MongoDB and MySQL, applying TypeORM and Sequelize for clean data access layers.
- Deliver SaaS, on-demand service, e-commerce, healthcare, and ride-sharing platforms — collaborating directly with clients to translate requirements into production-ready features.

Junior Developer (Front-End) | SeekAce Solutions

Jun 2021 – Jan 2022

Jaipur, Rajasthan · Software Development

- Contributed to admin panel development — built CRUD functionality for user registration module using PHP.
- Implemented data export feature (Excel) for admin reporting, reducing manual data extraction effort for the operations team.
- Maintained continuous learning mindset to keep pace with evolving frontend and backend technologies.

KEY PROJECTS

On-Demand Service Platform Node.js · ExpressJS · MongoDB · Stripe

- Architected multi-service on-demand platform supporting bathing, car washing, childcare, gardening and 10+ service categories.
- Built dual-interface system for customers and service providers with real-time booking, scheduling, and communication.
- Integrated Stripe payment gateway with subscription and wallet functionality for premium users.

E-Commerce Platform | *Node.js · ExpressJS · MongoDB · Ajax · Axios · UPI*

- Developed subscription-based e-commerce platform with points rewards system, wallet, and UPI/Stripe payment integration.
- Built backend agriculture buy/sell marketplace with product listing and transaction flows.
- Delivered separate feature sets for business users and premium users with role-based access control.

Tour & Travel Service | *Node.js · ExpressJS · MongoDB · Stripe*

- Built comprehensive travel booking app with personalized tour recommendations based on location and budget.
- Developed guide and transportation selection features with dual-platform support for guides and travelers.
- Integrated Stripe for secure payment processing across all booking flows.

Doctor / Patient Appointment App | *Node.js · ExpressJS · MongoDB*

- Developed appointment management system connecting therapists and patients for health checkup scheduling.
- Built social media module for healthcare professionals to post medical content (cancer, chronic illness awareness).

Employee Wellbeing SaaS | *Node.js · NestJS · MongoDB · TypeORM*

- Contributed to SaaS-based employee wellbeing platform with multi-tenant architecture.
- Built REST APIs for employee engagement features and integrated third-party wellness service providers.

Freelance Job Platform | *Node.js · ExpressJS · MongoDB*

- Built Fiverr-style bidding platform where job seekers can discover and bid on client projects.
- Implemented project posting, bid management, and communication workflows between clients and freelancers.

QR-Based Activity Tracker (Samsung) | *Node.js · ExpressJS · SQL · SQLite*

- Developed a QR-based customer engagement platform for Samsung retail stores across India.
- Enabled users to scan QR codes to access AI smartphone features, videos, and product information.
- Built APIs to track user interactions and send real-time analytics to the Samsung backend for store-wise visitor insights and engagement reporting.

EDUCATION

B.Tech — Computer Science & Engineering

2016 – 2020

St. Wilfred Institute of Engineering & Technology · Aggregate: 64%

CERTIFICATIONS

- AWS Community Day Participation Certificate
- White Hat Hacker & Penetration Tester — Eduonix
- Web Developer Course Completion Certificate
- Claude With The Antropic Api Completion Certificate
- Claude Code In Active Completion Certificate
- SEMrush SEO Toolkit Exam — SEMrush Academy
- Claude 101 Completion Certificate
